

# FFS Ventilene. Cleanliness, performance and 100% protection.

FFS Ventilene with controlled  
deaeration and venting system.

FFS Ventilene:  
ideal for all kinds  
of powder products.

Construction

Chemical

Food industry

Thanks to its **special ventilation system for controlled deaeration**, Ventilene is the best alternative to paper bags in terms of performance and product protection.

Reliable. Responsible.

Selene

# FFS Ventilene: ideal for powder products.

**No dust**  
**Cleaner surfaces and environments**

**High speed filling**  
**Higher production efficiency**

**Compact and shaped bag**  
**More stable and stackable pallets**

**Waterproof**  
**Better resistance to humidity**

**Sustainability**  
**Recycled polymers and reduced thickness**

FFS Ventilene is also available in the **NextBag™** version containing **up to 80% PRP** (Premium Recycled Polymer). A packaging that produces fewer emissions, ensuring the same quality of a product obtained with 100% virgin polymers.
